Abstract

Although previous literature has demonstrated the importance of age, ethnicity, and socioeconomic status in understanding grandparent–grandchild relationships, additional factors contribute to a more complete and nuanced understanding of multigenerational relationships. Thorough understanding of the role of diversity requires examination of the discrete impacts of grandparents' gender, sexual orientation, and physical and/or cognitive limitations on the relationship. This article focuses on these 3 important, yet overlooked, issues of diversity, with a focus on strength-based and empowerment-oriented strategies and their implications for practice, policy, and future research.

Keywords

Grandparenthood; grandchildren; caregiving; grandfathers; gay and lesbian elders; family diversity

With dramatically increased life expectancy, many grandparents will experience this family role for 30 or more years. Thus, more children will have the opportunity to develop enduring relationships with their grandparents. Presently, 94% of older Americans with children are
