

A Love For Learning: Motivation And The Gifted Child

Parenting

This small but powerful book stresses the author's underlying belief in: (1) the importance of unconditional love and a secure environment, (2) respect for each child's uniqueness, and (3) support and nurturance of the children's talents. Ten chapters offer stories and examples from the author's own family, including mistakes she made and comments from her three now-adult children.

Parents will gain knowledge about common vulnerabilities that characterize gifted children from early childhood into adulthood, along with advice for providing appropriate nurturance and guidance. Themes include:

- ★ Insatiable curiosity
- ★ Challenges to authority
- ★ Creativity
- ★ Multipotentiality
- ★ Perfectionism
- ★ Underachievement
- ★ Need for friends and socialization

I love this book and the way the author, who has a doctorate in gifted education, wove important, current research about giftedness into stories of raising gifted children, accompanied by fascinating personalized narratives from her successful grown-up gifted children. This is a resource for parenting gifted children that I highly recommend!

One of the best practical guides for raising gifted children, combining the charm, richness, and humor of personal family experiences with a gifted educator's practical knowledge. It could be titled *Gifted Children: The Missing Instruction Manual*.

Dale Stuart, Ph.D.

With understanding and humor...the author describes her gifted children, her successes and mistakes, and offers practical suggestions that feel like a conversation with a good friend. Her now-grown children add welcome perspectives to her ideas.
